

Engineering Technicians (Position #20102JW)

Performs customer support activities involving installation, modification and repair of equipment and systems onboard US Navy ships. Reviews project instructions and blueprints to ascertain specifications, material requirements, procedures, objectives, test equipment safety requirements, nature of technical problem and possible solutions such as parts redesign, substitution of material or parts, or rearrangement of parts or subassemblies. Under close supervision performs routine tasks. Performs tensile or hardness tests; operates and adjusts mechanical and electrical equipment and simple test equipment; records test data. Maintains data records. Assists in field or production activities such as data collection, equipment or machine design, testing, quality control and efficiency studies.

Qualified candidates must have:

- Navy shipboard experience in mechanical or electrical diagnostics, maintenance and repair work
- Knowledge of shipboard safety procedures
- Strong communication skills
- Proven work habits, as detail oriented, self motivated, reliable, hard-worker.
- Ability to climb ladders, carry heavy equipment and work in confined spaces

Starting rate is \$15.00-17.00 per hour based on years of experience.
